Evaluating Cladding Material Costs

Price Comparisons for Common Siding Materials (per sq ft)

This pricing comparison chart should help you establish some "ball park estimates" for siding materials to help you develop your building materials budget for your project.

This pricing comparison chart includes materials and labor to install.

An independent architecture firm created this pricing chart as part of a product and evaluation process.

All design professionals are responsible for their own product evaluations.

It is up to the viewer to determine the value of the presented information.
