Evaluating Cladding Material Costs

Price Comparisons for Common Siding Materials (per sq ft)

This pricing comparison chart should help you establish some "ball park estimates" for siding materials to help you develop your building materials budget for your project.

This cost comparison chart encompasses both materials and installation labor. Developed by an independent architectural firm during a product assessment, this chart serves as a reference. Design professionals should independently verify and evaluate the products. The responsibility lies with the viewer to assess the relevance and worth of the information provided.
