This wood product and its packaging are either kiln-dried or fumigated before export from the country of origin, ensuring they are nearly free from invasive insects, plants, or animals.

Fumigation involves the use of DELTAMETHRIN 25GL and 56% PHOSTOXIN TAB. (Gaseous) with a concentration of 250 ml per 15 liters of water. The chemicals dissipate within 3 to 7 days and have no residual effects. This fumigation process is conducted in Brazil.
